

PSU Human Services Implementation Lab (iLab)
Zero Suicide (ZS) in Health Systems
Implementation Assessment Options
2025 Fee Schedule

Primary and behavioral healthcare systems in Oregon may be eligible for an assessment at no or reduced cost. Contact info@hsimplementationlab.org for more information.

Option	Cost	Description
OPTION 1: FULL EXTERNAL ASSESSMENT Virtual or in- person	\$11,000	<p>This external full implementation assessment can be a combination of in-person or virtual meetings and data collection. It includes:</p> <ol style="list-style-type: none"> 1. A launch meeting with leadership and the iLab 2. An in-person or virtual site visit to observe your physical environment 3. Interviews with 2-4 key staff members 4. A customized staff web survey and written survey report 5. Consumer input (web survey, focus groups, or existing data) 6. Document review 7. Generation of preliminary assessment scores and recommendations 8. A facilitated review to finalize the preliminary scores with site leadership 9. A final written comprehensive report that can be used for planning purposes 10. <i>Sites will have the option to access one paid virtual or in-person full external follow-up assessment for the reduced cost of \$4,500 if they request it within 18 months of the previous full external assessment. Follow-up reports include charts of changes in implementation ratings over time.</i> <p><i>Additional fees for cost of travel to in-person assessment sites will be negotiated based on location.</i></p>
OPTION 2: CUSTOMIZED ALL-STAFF WEB SURVEY	\$5,000	<p>This customized all-staff web survey will provide data needed for an internal self-assessment of ZS implementation. Survey questions are directly tied to indicators in the Oregon Zero Suicide Implementation Assessment Tool. The web-survey option includes:</p> <ol style="list-style-type: none"> 1. Survey questions directly tied to indicators in the ZS Implementation Assessment Tool 2. Customized response options to match the departments, staffing and terminology used by your site. 3. The option to add additional questions (to reduce the burden of multiple staff surveys) 4. A written survey report 5. A virtual review of the written survey report

OPTION 3: FACILITATED MULTI-RATER SELF ASSESSMENT	\$3,000	This facilitated self-assessment will result in a written report of scores determined internally by the site. It includes: <ol style="list-style-type: none"> 1. A one-hour orientation with site leadership and the iLab 2. An online ZS Implementation Self-Assessment survey for up to 6 respondents or department heads to score themselves 3. A preliminary report of average scores across respondents 4. A facilitated review of the average scores with site leadership to come to consensus around a single self-assessment score for each Zero Suicide indicator. <p>A final written report of implementation scores for each Zero Suicide element and the indicators of implementation within those elements.</p>
OPTION 4: ONLINE SELF- ASSESSMENT	\$1,750	Healthcare systems may fill out the ZS Implementation Assessment Instrument online for their own reference. The online form will generate an automated report for planning purposes. Contact info@hsimplementationlab.org for a customized survey link.
Additional HOURLY CONSULTATION	\$250	One hour of consultation with the iLab
Travel to Site	Varies by location	Fees for cost of travel for in-person assessment or consultation will be negotiated based on location.
Individual a la carte services from Option 1	Varies by service	Examples: Collection of consumer input, document review, key informant interviews with verbal report

**The Oregon Zero Suicide all-staff web survey includes all questions from the Zero Suicide Institute (ZSI) Workforce Survey and additional questions needed to score the Oregon Implementation Assessment Tool. For external assessments, organizations may provide the results from a recent ZSI Workforce Survey instead of asking staff to complete the survey a second time. In that case, some Oregon indicators might not be scorable unless the organization opts to survey staff again using a shorter survey limited to the additional questions needed to score those indicators.*

Note: This assessment methodology utilizes Oregon Zero Suicide Implementation Assessment Tool (version 2.1), an adaptation of EDC's Zero Suicide Organizational Self-Study. This tool was developed [in part] under Zero Suicide in Health Systems grant #SM083398 and Garret Lee Smith Youth Suicide Prevention grant #SM061759 from the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS). The views, policies, and opinions expressed are those of the authors and do not necessarily reflect those of SAMHSA or HHS. For more information and/or a no-cost electronic copy of the full instrument, visit, visit <https://hsimplementationlab.org/>
